SUMMARY

Full Stack Developer experienced in building and shipping production web applications, e-commerce stores, dashboards and AI-powered automations for real clients. Comfortable across the entire stack — from responsive front-end interfaces to REST APIs, databases and cloud deployment. Fast, self-taught learner with strong ownership, used to delivering complete solutions end to end. Advanced English.

TECHNICAL SKILLS

- Languages:** JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3
- Front-End:** React, Responsive Web Design, Tailwind CSS, GSAP animations, UI/UX, Single Page Applications (SPA)
- Back-End:** Node.js, REST API design and integration, JWT authentication, JSON, payment flow integration, Streamlit
- Databases & Cloud:** PostgreSQL, MySQL, MongoDB (NoSQL), AWS cloud deployment, Vercel, GitHub Pages
- AI & Automation:** LLM API integrations, chatbot development, lead qualification automation, Telegram Bot API, Google Sheets integration
- Tools & Practices:** Git, GitHub, version control, debugging, cross-browser compatibility, mobile-first development, agile collaboration with clients

PROFESSIONAL EXPERIENCE

AIOTI Soluções Industriais 2025 – Present
Full Stack Developer — industrial automation / IoT company

- Built the company's client-facing **industrial monitoring platform**: a web dashboard where customers track their equipment in real time, developed with **Python on AWS, PostgreSQL** and secure **JWT authentication**.
- Developed and maintain the company's official website ([aiotisolucoes.com.br](#)), presenting engineering, automation and IoT services.

Freelance Full Stack Developer May 2024 – Present
Websites, e-commerce and AI automations delivered end to end for clients

- Designed and shipped the **Colmeia Encantada online store** (children's fashion): product catalog with category filters, GSAP animations and a checkout/payment flow in **JavaScript and Node.js** — [gyshro.github.io/Colmeia](#).
- Built the **Sabtec print shop website** with an integrated customer-service chatbot and mobile-first responsive layout — [gyshro.github.io/Sabtec](#).
- Created an **AI customer-service agent** that qualifies leads automatically and delivers results through Telegram and Google Sheets (Python + Streamlit), sold as a product for small businesses.
- Led a 4-person team building a website for a **SESI Robotics Festival** team (Subsilence project), delivered in about one month.
- Developed landing pages and styled sales websites for a variety of client demands.

PROJECTS

- Industrial Monitoring Platform** — production dashboard on AWS with Python, PostgreSQL and JWT-secured login.
- Personal Portfolio** — interactive 3D keyboard, physics-based badge and scroll animations, built from scratch with vanilla JavaScript and GSAP — [live site](#).
- Chat Widget** — lightweight customer-chat widget that integrates into any website with a single line of code (JavaScript).
- Social Network (personal)** — social network concept inspired by Facebook, Instagram and Orkut with customizable pixel-art avatars.

EDUCATION & CERTIFICATIONS

- Associate Degree, Systems Analysis and Development — Estácio University** In progress
- DevQuest University Extension Program — FEX Education (accredited by MEC, Brazil)** 2023 – 2026
123-hour program: HTML, CSS, JavaScript, React, TypeScript, Node.js, SQL, Git and hands-on projects.
- Front-End Development (80+ hours) and Back-End Development (20+ hours) — DevQuest** 2026
